

CONCERO

Concero is Gaea's next-generation mobility-enabled application that allow Oracle Primavera field-service users to update activities and statuses they are assigned to in real-time. Concero greatly improves process quality of organizations by enabling real-time access to project data.

Concero's Activities Quick View enables field service personnel to sequence their work better, update activities as and when they are getting completed allowing project managers to get a real-time update on work performed on-site, thus reducing costly delays.

Solution Features

- User Logs into Concero using Blackberry (Now available on Android and symbian mobiles).
- User can view his list of activities by project.
- User can update the status of activities.
- User can use the blackberry's in-built camera and take a snapshot of the activity he/she is working on.
- User can send feedback to project manager and raise issues using his mobile.

Solution Benefits

- Improved productivity of field service personnel
- Easy Easy to download from corporate website as an application
- Seamlessly integrates with Primavera using Webservices
- Easy to use interface with minimal training effort needed
